Linux Ubuntu Interface Installation Guide

1. HowTo install Cryptovision Utility: scInterface on Ubuntu 22.04

- Download .deb file open linux terminal, move into folder containing .deb file and run:

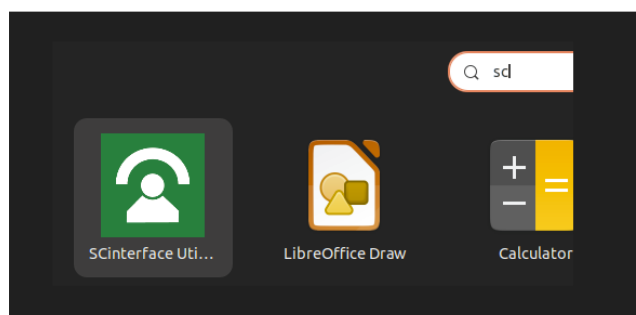

1. `sudo chmod 777 scInterface-8.1.7.726-Ubuntu22-x86_64.deb`

```
sudo chmod 777 scInterface-8.1.7.726-Ubuntu22-x86_64.deb
```

2. `sudo apt install scInterface-8.1.7.726-Ubuntu22-x86_64.deb`

```
sudo apt install ./scInterface-8.1.7.726-Ubuntu22-x86_64.deb
```

- Resolve any error or dependency if detected in linux terminal, if all runs clear open cryptovision utility, search for scInterface utility in Ubuntu App Center and run it.

- Make sure reader is plugged into USB port and demon 'pcscd.service' is running, from terminal cli:

```
systemctl status pcscd.socket
```

- Place eID / eRES card on reader and wait for first scan, wait scInterface software will ask to enter code called 'CAN', printed on card itself.
- Proceed to change PINs [Signature and Authentication] if it is first time using eID/eRES card
- Verify USB reader can see certificates installed inside the card, there are 4 certificates.
